Every retained H / He / Li ionic state

125/125 completed cases | s03_m03_r03 | $(\Sigma_0, \widetilde{\Pi}_{m0}, \widetilde{\Pi}_{r0}) = (0.15, 0.0005, 0.0006)$

n and T initial inventories = 0; max saved abundance = 0 per baryon. No populated decay history is implied.

Fractions use the initial isotope inventory; values are not clipped or renormalized. Symlog linear band: |fraction| <= 1e-10.

Conditional prescribed T / UV; test-fluid baryons | Physical HOLD
