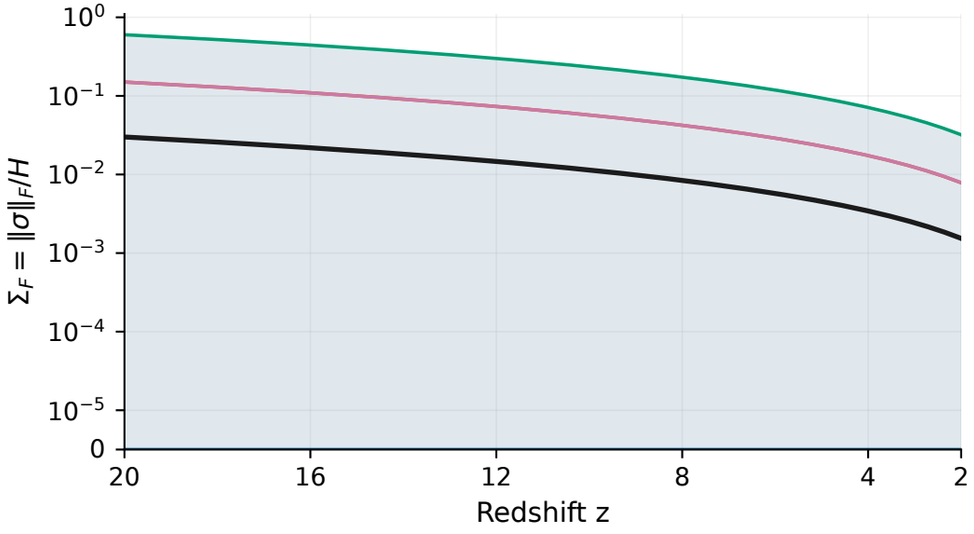
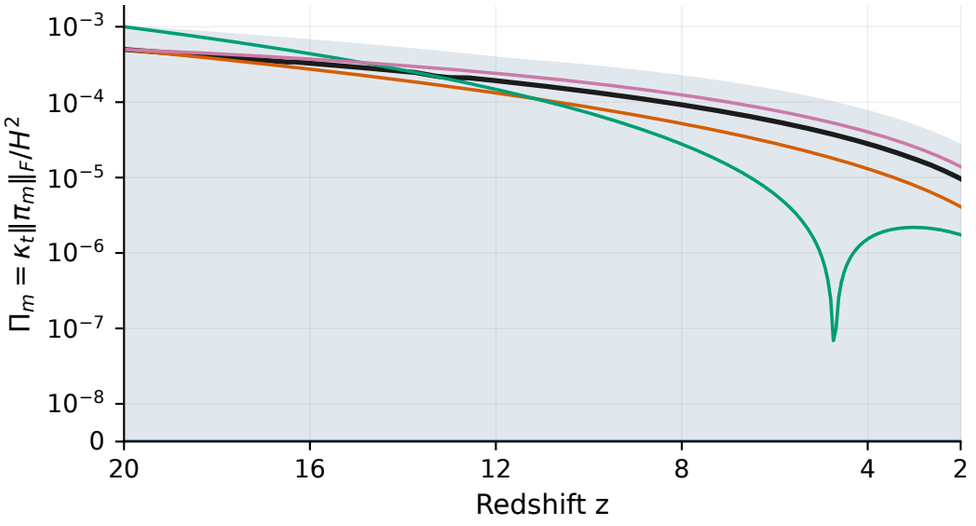
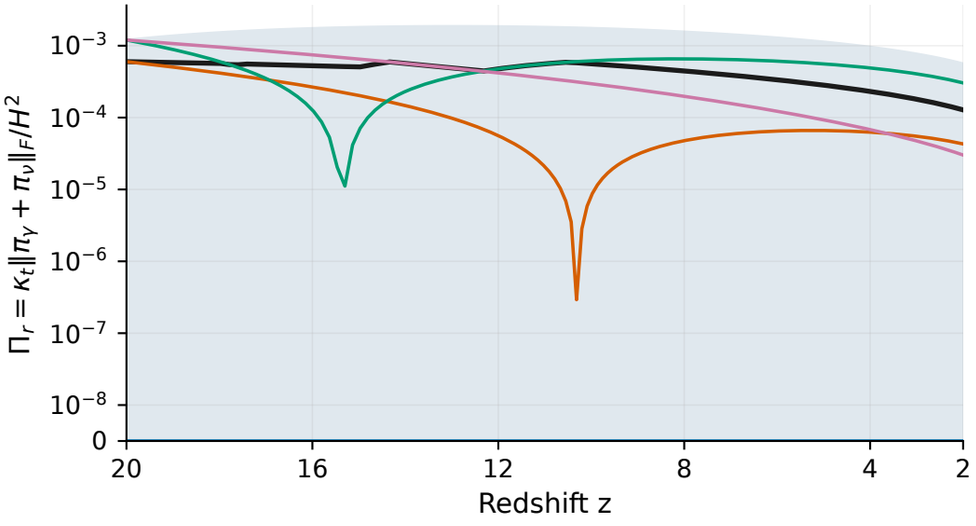
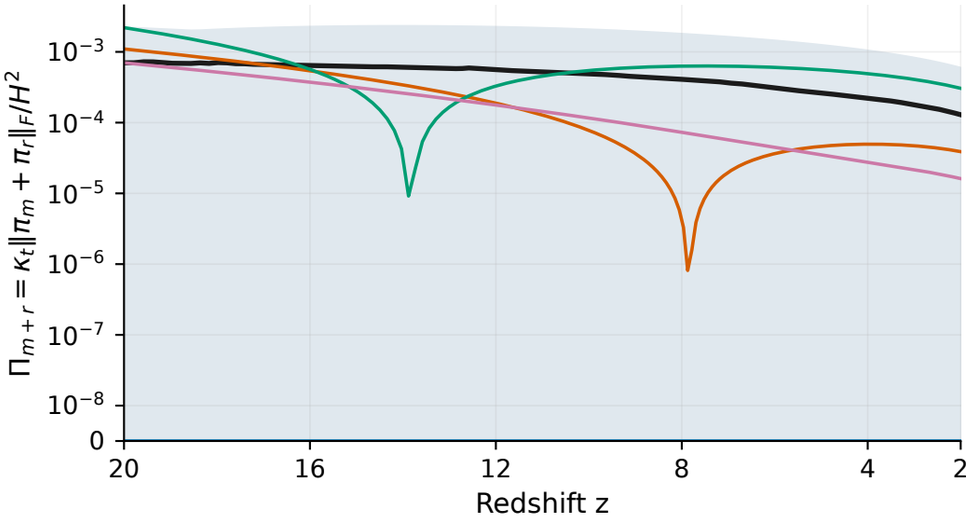
LRS Bianchi I: shear and separate stress evolution

125/125 completed cases | Frobenius norms; signed components added before total norm









Min-max of completed cases
Median of completed cases
$(\Sigma_0, \widetilde{\Pi}_{m0}, \widetilde{\Pi}_{r0}) = (0, 0, 0)$
$(\Sigma_0, \widetilde{\Pi}_{m0}, \widetilde{\Pi}_{r0}) = (0.15, 0.0005, 0.0006)$
$(\Sigma_0, \widetilde{\Pi}_{m0}, \widetilde{\Pi}_{r0}) = (0.6, 0.001, 0.0012)$
$(\Sigma_0, \widetilde{\Pi}_{m0}, \widetilde{\Pi}_{r0}) = (0.15, -0.0005, 0.0012)$

Legend coordinates are declared initial targets; actual baseline residuals remain in the saved data.

Conditional prescribed T / UV; test-fluid baryons | Physical HOLD
