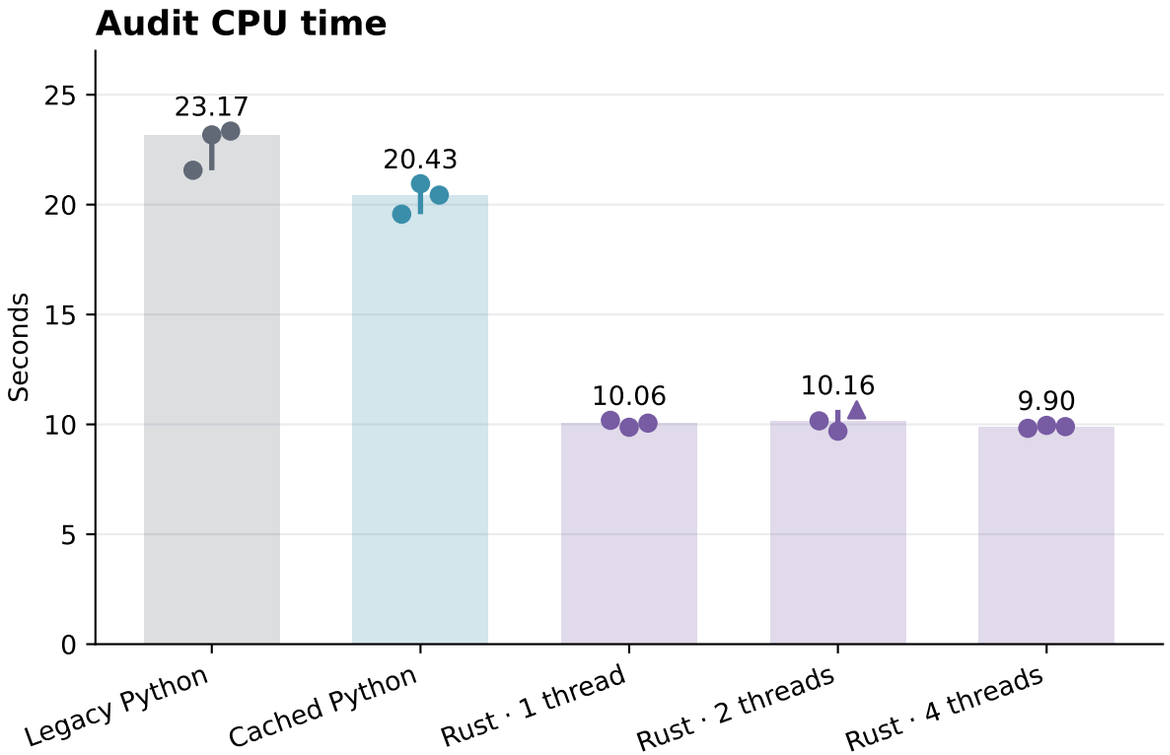
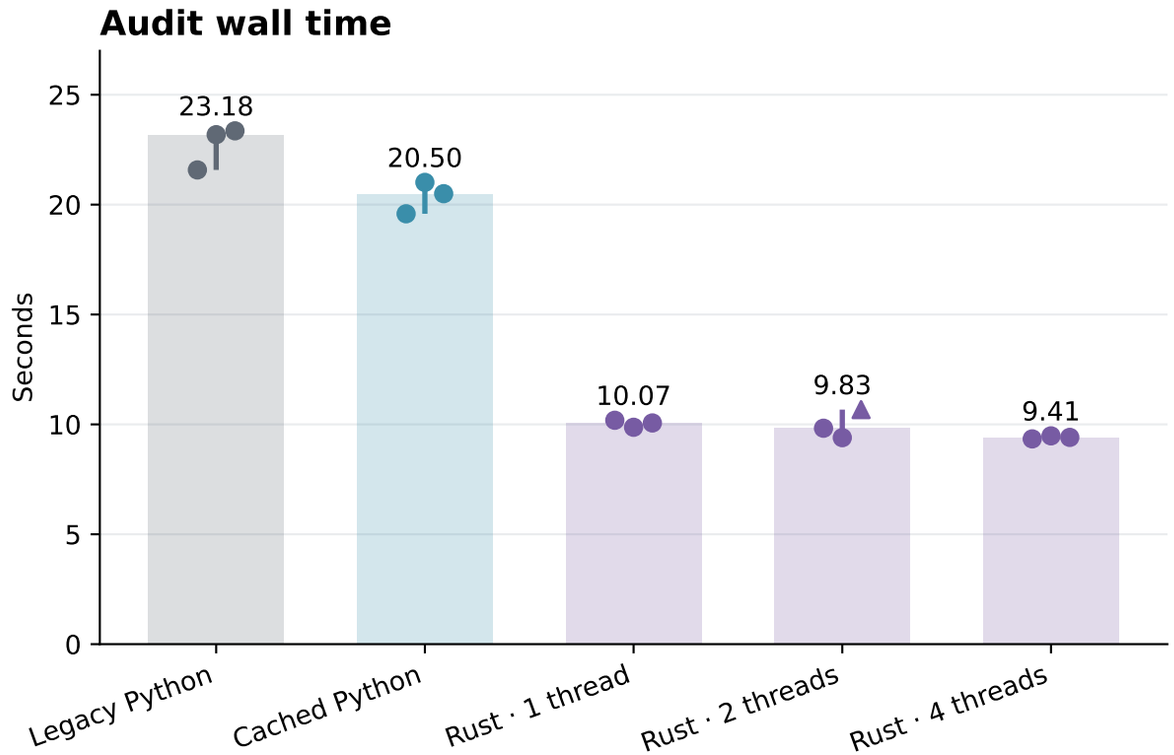
R3P · exact verification of saved R3M output

8,510,412 prefix/spectral fields + control records per audit; 15/15 identical verdicts and native-array hashes





Bars: median of 3 observations. Whiskers: observed range, not a confidence interval. Triangle: missing sample completed after resource-limit repair.
CSV parsing, allocation and checks included; setup separate. No new physical integration or production speedup is measured in this figure.
