ANGULAR01 — supplied local isotropic-source operator
Finite-depth scalar suppression
Measured defect and analytic upper bound
LRS s=-0.8
LRS s=0.8
LRS s=1.8
Triaxial C
$[\beta_{iso}(t) - B]/\beta_{iso}(t)$
$|1/t - B|/B$
Mean optical-depth parameter $t = C/H$
$t = C/H$
Solid: saved quadrature comparison
Dashed: analytic truncation bound
Zero/underflow values are not plotted
